

ABSTRACT

【Problem】 A dust cover for a steering prevents offensive sounds from emitting during an operation of a steering wheel.

【Means for Solving】 A dust cover for a steering shaft according to
5 the present invention includes: a bush 2 made of low-frictional material, through which a steering shaft 20 penetrates; a plurality of bellows 3 made of rubber, provided in an axial direction of the steering shaft 20, and arranged between the bush 2 and a panel 19, for sealing the clearance; and an annular seal lip 4 in contact with the outer periphery of
10 the steering shaft 20.
